# ECKLER'S Chevelle

## Welcome Chevelle Owners!

You now have the world's largest supply of 1964–72 Chevelle parts and accessories at your fingertips, as well as a team of enthusiasts and experts at your disposal who can offer technical assistance and practical advice pertaining to your particular car. We sincerely appreciate your business, and look forward to working with you on your version classic Chevelle!

## Lowest Price Guarantee

Eckler's Guarantee is simple: You always get the best quality parts at the lowest price! Show us the identical item advertised in any current magazine, catalog, or website and we'll match our competitor's current price, guaranteed! This offer is available only at the time of purchase and applies to in-stock merchandise only. We can't combine this with any other offer. Tires, restoration services, kits, window glass, cores, reproduction batteries, certain engines, transmissions, used parts, special order parts, and shipping and handling charges are excluded.

## Eckler's Gift Certificates

The perfect gift when you just can't decide. Available in many different amounts, from $25 right up through $1,000. Easy to ship, too!

## The Best Parts at the Best Price

This is not just a slogan! Eckler's is committed to providing the highest quality parts at the most competitive prices. We source and select all of our parts exclusively from the world's leading brand name manufacturers using our massive buying power. This means you get the best there is, at the best prices on the market today.

## 100% Satisfaction Guaranteed

Our commitment to you: If for any reason you are not 100% satisfied with any of our products, simply return it for a full refund, credit or exchange—your choice.

## More Than 50 Years of Innovation

*In the early 1960s, Ralph Eckler's vision began by manufacturing fiberglass replacement parts for Corvettes out of his small shop in Illinois. As the Corvette grew in popularity, so did the restoration/aftermarket business. In the early 1970s, Eckler's relocated to central Florida, and the company flourished into a multimillion dollar business. Today, Eckler's employs more than 200 people and provides the classic car industry with more than 130,000 parts for classic Chevrolet, Ford, Porsche, and Mercedes-Benz.*

## 1964-72 Big Brake Kits

- *PBR C15 Calipers Have Twin 52mm Pistons And A Larger Brake Pad Surface*
- *Rear System Uses 12", Cross-Drilled And Slotted, Zinc Washed Rotors Which Mount To The Factory Axle Flange With The Longer Studs Supplied*
- *Must Be Used With A Minimum 17" Wheel*

The front system uses a 13" cross-drilled, gas slotted and zinc washed rotor mounted to a 2024 T6 billet aluminum CNC machined anodized hub and a PBR C15 caliper that attaches to the spindle with a custom caliper mounting brackets. PBR C15 calipers have twin 52mm pistons and a larger brake pad surface area that offers about 60% more stopping power in the caliper than the popular C5 caliper at half the cost. This kit includes all the bearings, seals, dust caps, brackets, cables, hoses, clips, instructions and necessary hardware to assure a hassle-free installation.

***NOTE: 1964-66 steering columns without tilt had two possible turn signal switch styles. To tell what style switch you have, you must pull it and visually inspect it. If your switch is mostly all plastic, it was made by Guide and uses replacement 603348. If your switch is plastic with a die-cast metal lower, it was made by Boyne stamped BPC and uses a 50-203634 as a replacement. Please make sure you inspect your switch for correctness before ordering as these switches are not interchangeable.**

**NOTE 1: Most 1967 AC equipped cars used a separate harness for air conditioning. However, the factory does list these harnesses as original equipment and they incorporate the AC wiring in the engine harness as per 1966 design. When ordering, please specify which AC design is in the car so that the correct harness can be provided. NOTE 2: In some cases these harnesses could have been factory equipped with an idle control solenoid lead wire. This wire will not be built into these harnesses unless specifically requested.**

Thick flanges (3/8" to 5/8")... no warping
Machined sealing surfaces... no annoying leaks
CNC mandrel bent tubes... accurate fit & better flow
Precision formed long transition collectors... reduces backpressure
TIG welded ports... added strength
Heavy gauge tubing (16 & 14G)... longer life
Header tubes are pre-polished... better appearance
Optional ceramic coating for heat and corrosion resistance up to 1400 Degrees

The original DOUG'S HEADERS

PERTRONIX PERFORMANCE PRODUCTS

## 1964-1967 Small Block Performance Full Length Headers

Doug's Headers is the most respected name in the header industry since 1958. Every Doug's header is tuned with the proper tube size and length to efficiently remove all the exhaust from each cylinder, reducing pumping losses resulting in a dramatic increase in horsepower and torque. Doug's headers are carefully developed on the vehicles they are intended to fit and are re-checked numerous times during the design and manufacturing process. Doug's headers come with all the necessary mounting hardware, collector reducers or connector pipes, premium gaskets and detailed installation sheets. Extra thick gaskets are rated up to 1100ºF, pressure to 3700 psig (255 bar) and are designed for an exact, port match with Doug's headers. Headers are offered bare or in an optional high luster metallic ceramic thermal barrier coating. This ceramic coating is simply the best header finish on the market, it protects and extends the life of headers by creating a thermal barrier which significantly lowers under hood temperatures and protects the substrate metal from thermal fatigue. Prior to the application of the coating, all header tubes are pre-polished to remove clamp marks and scratches which result from the mandrel bending process. After the coating is applied, it is polished with a vibratory finishing process which produces a high luster aluminum appearance. The polishing process compresses and activates the coating, which increases the surface hardness to produce a finish that is 60% more corrosion resistant than an unpolished surface. This coating is easy to maintain and will last for years under normal operating conditions. Doug's will not compromise performance, quality or fit to compete with inferior designs.

**The ignition placement on your new Ididit column will be lower than the factory position. This new position is (while looking at the steering wheel) roughly 5 o'clock with a slight angle toward the rear of the car. Placing the ignition slightly lower helps reduce key friction and from chipping or wearing away the paint on your column. Please make sure this placement will be satisfactory before purchasing your new column.**

## About Distinctive Industries

It started in a little Santa Monica car upholstery shop, with a dream, a prayer, and a whole lot of pride. It has become an industry legend. Manufacturing perfect factory replacement automotive interior products since 1969, Distinctive Industries pioneered the aftermarket replacement interior industry. Since then, Distinctive Industries has quietly become the world's leading provider of OEM quality interiors for 1960's, 1970's, 1980's, 1990's, and early 2000's muscle car, special interest, and collectible vehicles. These factory reproduction interiors capture the essence of original manufacturing techniques, utilizing exact factory color matching, grain, and textured materials. Our products are continuously recognized for quality in craftsmanship. Our interiors are cut on state-of-the-art digital cutting machines, sewn to original specifications, and inspected by the most knowledgable manufacturing staff in the industry. Often copied, but never equaled, Distinctive Industries is your one stop solution for all of your auto interior restoration needs.

## About Distinctive Industries

It started in a little Santa Monica car upholstery shop, with a dream, a prayer, and a whole lot of pride. It has become an industry legend. Manufacturing perfect factory replacement automotive interior products since 1969, Distinctive Industries pioneered the aftermarket replacement interior industry. Since then, Distinctive Industries has quietly become the world's leading provider of OEM quality interiors for 1960's, 1970's, 1980's, 1990's, and early 2000's muscle car, special interest, and collectible vehicles. These factory reproduction interiors capture the essence of original manufacturing techniques, utilizing exact factory color matching, grain, and textured materials. Our products are continuously recognized for quality in craftsmanship. Our interiors are cut on state-of-the-art digital cutting machines, sewn to original specifications, and inspected by the most knowledgable manufacturing staff in the industry. Often copied, but never equaled, Distinctive Industries is your one stop solution for all of your auto interior restoration needs.

## About Distinctive Industries

It started in a little Santa Monica car upholstery shop, with a dream, a prayer, and a whole lot of pride. It has become an industry legend. Manufacturing perfect factory replacement automotive interior products since 1969, Distinctive Industries pioneered the aftermarket replacement interior industry. Since then, Distinctive Industries has quietly become the world's leading provider of OEM quality interiors for 1960's, 1970's, 1980's, 1990's, and early 2000's muscle car, special interest, and collectible vehicles. These factory reproduction interiors capture the essence of original manufacturing techniques, utilizing exact factory color matching, grain, and textured materials. Our products are continuously recognized for quality in craftsmanship. Our interiors are cut on state-of-the-art digital cutting machines, sewn to original specifications, and inspected by the most knowledgable manufacturing staff in the industry. Often copied, but never equaled, Distinctive Industries is your one stop solution for all of your auto interior restoration needs.

## 1964-72 Hotchkis Geometry Corrected Front Tubular Upper Control A-Arms

- *Geometry Corrected Design Increases Caster And Improves Camber Curve*

Install the Hotchkis sport suspension geometry corrected tubular upper A-arms on your Chevelle and gain vastly increased handling and control. These TIG welded; bolt-on control arms offer premium quality construction for ultimate performance and a great look. Smooth operating polyurethane bushings in the 4130 billet cross shaft allow the A-arms to move through their travel easily. Finished in gloss black powder coat, the arms are ready to install and are complete with premium ball joints and polyurethane droop stops. Easy installation with no vehicle modifications required. For even greater handling improvements combine with the Hotchkis performance tubular lower A-arms.

## 1964-72 Hotchkis Tubular A-Arms

- *Geometry Corrected Design Increases Caster And Improves Camber Curve*
- *100% TIG Welded Construction*

Upgrade your Chevelle's front suspension with the use of our tubular A-arms. Our tubular A-arms are designed to adapt the use of taller GM spindles allowing for improved suspension geometry by creating a negative camber curve and increased caster. Disc brakes are easily upgraded with factory 11" or 12" rotors. These arms feature TIG welded construction, and greasable polyure-thane bushings, upper and lower ball joints, and chromoly offset cross shafts. NOTE: Arms do not work with factory spindles. Spindles required are 70-76 GM F-body or 78+ GM G-body. Spindles will lower vehicle 3/4" and widen track width 3/8" per side. Please consult an Eckler's Chevelle representative with any specific questions regarding this conversion.

## 1964-72 Detroit Speed Front Control Arms With Spindles

- ***Tubular Upper And Lower Control Arms***
- ***DSE Forged 2" Drop Spindle***

Detroit Speed control arm and spindle kit is designed to work as an integrated system on your vehicle. The Detroit Speed spindle is 1½" taller than the stock spindle and provides 2" of drop from stock height. The taller spindle height improves handling by modifying the camber curve resulting in a negative camber gain during suspension compression. The stock steer arms mount in the optional location to minimize bump steer. DSE's tubular upper control arms provide increased strength and additional positive caster. They feature five axis laser cut tube ends and ball joint pockets for a precise fit. The upper control arms are TIG welded in fixtures to guarantee geometric accuracy and repeatability. They have Delrin bushings, new ball joints, and a gloss black powder coat finish.

## 1964-67 Detroit Speed (DSE) Rear Suspension Speed Kit 1

- *Patented Swivel-Link™ Rear Control Arms*
- *DSE Chassis Brace Kit*

Our special kits are designed to make your Chevelle maintain optimum geometry and tire contact through the full range of rear suspension travel. Through the use of our patented Swivel Links™, the rear end housing becomes fully articulated, without the use of noisy spherical heim joints. The DSE tubular rear sway bar attaches to the chassis for a substantial improvement in cornering ability. DSE rear speed kit springs, shock absorbers and sway bars are designed to complement the front DSE speed kits.

## 1964-72 Detroit Speed (DSE) Chassis Braces

- *Specifically Designed For The Chassis For Performance*

Through an extensive testing program, DSE discovered there are substantial improvements that could be made over the original rear chassis braces. By triangulating the rear crossmember, frame rail and upper control arm mount, we were able to reduce deflection within the rear section of the chassis. While designed as a replacement for Chevelles originally fitted with rear braces, these can be installed on cars originally built without the braces with minimal effort, for substantial structural improvement.

## 1964-72 Detroit Speed (DSE) Front Sway Bar

- *Necessary Mounting Hardware Included*
- *Existing Sway Bar Mounting Holes Need To Be Drilled And Tapped Up To 3/8" On 64-66 Models*

Detroit Speed's tubular front sway bar is designed to address the shortcomings of the small factory sway bar. The DSE sway bar kit comes with greaseable polyurethane bushings, mounts and end links. Extensive testing revealed dramatic improvement on cars with stock suspension and optimal improvement on cars fitted with other DSE components. The bar and arms are specifically designed for the Chevelle chassis for performance, filment and clearance.

## 1964-72 Helwig Silver Vein Sway Bars

- *Made Of Hot Formed 4140 Chrome Moly*
- *Feature Upgraded Hardware*
- *Powder Coated In A Silver Vein Finish That Helps Retain Bushing Lube Improving Performance And Eliminating Noise*

From 1964-1972 Chevelles were equipped in one of four ways regarding front sway bars. They were delivered without one, with an 11⁄16", 7⁄8" or with a hi-performance F41 1" bar. For cars equipped without a bar the Helwig bar will make a night and day difference in improved cornering. For cars with the standard 7/8" bar you'll be getting a 50% bigger bar with a whopping 500% increase in roll stiffness which translates into seat of the pants performance you can really feel. Unfortunately A-body cars like Chevelles with factory equipped sway bars have a terrible tendency to roll heavily in corners which places most of the cornering load on the outside of the tire. This results in a loss of cornering force and unnecessary tire wear. Regardless of what bar your car came with, the Helwig sway bar will keep your front tire firmly planted on the ground for great handling and dramatically reduce the uncomfortable feeling you have in hard cornering when the car leans so hard to one side or the other it feels like it's going to fall over. Helwig anti-sway bars are supplied with polyurethane mounting bushings so you get instantaneous sway bar reaction when you hit the corner. In addition to improved performance you'll find Helwig's heat treated 4140 chrome moly steel bar is 50% stronger than aftermarket and factory non-heat treated bars and you'll like the good looks of their hammer tone silver bars that won't chip or peel ever! Each Helwig bar is supplied with grade 8 mounting bolts, the best in the industry, and large 7⁄8" cap screws that are virtually indestructible. So for the best in performance and quality, count on Helwig sway bars from Eckler's Chevelle.

PhotoSTEEL™ is rustproof and can be used in outdoor, harsh environments. It can be mounted on a wall without any need for framing. It is sturdy enough to stand independently, lean against a wall, use as a table top or hang freely from the ceiling or an outside eave. The finished product, typically made from heavy fourteen gauge steel, gives it a substantial and rich feel that will continue to impress for years to come.

## Ordering is Easy!

We accept credit and debit cards, checks, and money orders, as well as first party, preprinted checks from U.S. banks with your order.

There will be a $25.00 charge for all checks returned for insufficient funds.

## Returns

We understand that from time to time, parts might not meet your expectations. You may return most parts for a full refund. Product must be received within 30 days of the date of the invoice to be eligible for a full refund. Items received from 31-60 days after invoice are subject to a 25% restocking fee. When returning an item, please enclose a copy of the original sales invoice and package the item in its original packaging. All returns must be unused, in original packaging, and prepaid. Allow up to 3 weeks from the date of shipment for processing, refunds, credits, and exchanges. Unfortunately, not all items are eligible for return. Date-coded (stamped) items, personalized items, custom carpet and floor mats, and custom clothing are some of the items that cannot be returned.

## Shipping and Handling Rates

Once we package your order, we choose the fastest, most economical way to ship the packages from our facility to you. Depending on the weight and size of the package(s) in your order, we utilize services that offer package tracking. Items that are oversized (denoted by ), heavy (denoted by ), or exceed shipping limits, are sent to you via truck.

Rates apply to ground service shipping within the 48 contiguous states. Truck-shipped parts and rates for Alaska, Hawaii and Puerto Rico might vary.

denotes items that ship via truck.

denotes oversized dimensions or weight. An additional $9.99 is added to the shipping and handling charges for each symbol shown.

## Shipping Table

| $800.01 to $1,000.00 | add $50.99 |
| Over $1,000.00 | add $55.99 |

## International Orders

We are International shipping experts. Many of our customers live internationally. With very few exceptions, all items are available to purchase either on the web or via phone or fax. Need an interpreter to place your order? Simply ask your sales agent and we'll assist you. We select the best carrier to ship parts to you most efficiently. Canadian and International shipping will be determined by your country, product dimensions, and product weight. We would be happy to give you an estimate over the phone or via email.

## Need it Fast?

Have your order delivered within 1 or 2 business days by using Express Shipping! Express shipping is limited to in-stock, non-oversized items weighing less than 20 pounds. Orders must be placed Monday–Friday before 1:00 p.m. EST.

- Add $19.99 to your shipping and handling rates for two-day delivery.
- Add $29.99 to your shipping and handling rates for one-day delivery.
- For next day delivery of oversized or heavier items, please call our sales team for rates.

## Same-Day Processing

Our standard U.S. order processing time for in-stock items is 24 hours. If you need your order processed the same day, simply call us M-F before 1:00 pm EST and request same day-processing. For $3.95, we'll provide special processing of all in-stock parts through the warehouse the same day.
